

PBS Integrates with DMT/KIA

PBS and DMT have collaborated to offer users at KIA dealerships simple steps in the PBS software that will track the time it takes for customer leads to receive a response. This information is communicated back to DMT for reporting to Kia.

“Thank you for working with the DMT team on the KIA integration project. KIA has sent a communication to the KIA dealership network identifying PBS as a certified vendor,” said Kevin Green, DMT Development Systems Group.

About PBS Systems

Currently in its 28th year, PBS Systems is a leading provider of DMS software. PBS is Microsoft Windows based, making it the most intuitive and user-friendly DMS available. PBS continuously strives to find ways to help their customers be more productive, more efficient and more profitable.
